

Write an algorithm which will insert a node at the beginning of SLL.

09 August 2020 07:13 PM

InsertBegin(start, avail , item)

```
If avail = null  
    Print overflow  
    Exit  
Endif  
save <- avail  
avail <- link-> avail  
ptr <- start  
start <- save  
data -> save <- item  
Link -> save <- ptr  
end
```
