

Write a algorithm that will print all the node number having data part that contain even values

09 August 2020 06:13 PM

checkEven(Start)

```
If start = null  
    Print list is empty  
    Exit()  
End if  
Count <- 0  
Ptr <- start  
Repeat  
    Count = count + 1  
    If ptr-> data is even  
        Print counter  
    endif  
    ptr = ptr -> address  
    If ptr-> address = null  
        Exit  
    Endif  
End repeat
```

Counter	Ptr	Data	printed value
1		3	
2	10		2
3	5		
4	12		4

Output : 2, 4
